

To Whom It May Concern:

We have been notified of an important issue being considered by your agency. Advocates of LPFM stations are wanting priority over current FM translator services. We are in disagreement with this proposed policy change. These smaller stations would interfere with our capability of hearing our radio stations, including K-LOVE (FM 88.9). In this time when there is so much questionable material going out on the airways, it is refreshing to know that K-LOVE is a friendly family oriented radio station. We do not have to worry what our family will hear. No matter where we travel, we know that we can hear this radio station. If the current policy change is put into effect, there is no guarantee that our family would have a radio station that would give us this same worry-free listening. K-Love and other radio stations like this one are important because they support wholesome values and have a positive and encouraging impact on not only our community but communities across this nation. We ask you to please reconsider your proposed change to the LPFM translator services and keep K-Love and other stations like it on the air and without interference from the Low Power FM stations. Thank you.
